## \*\*Quality and Environmental Policy\*\*

### \*\*Quality and Environmental Policy\*\*

1. Under the slogan “Striving to be ‘One of a Kind’ through Original Technology,” we will develop and manufacture high-quality products that prioritize safety and environmental friendliness by leveraging our unique technologies, thereby contributing to the advancement of society.
2. As part of our commitment to high-quality manufacturing, we will strive to achieve zero customer complaints and continuously maintain and improve customer satisfaction.
3. We will conduct our business operations in compliance with all applicable laws and regulations and implement measures to prevent environmental pollution, while continuously improving our operational processes and management systems.
4. We aim to realize environmentally friendly manufacturing by promoting green procurement and contributing to the development of a circular society through waste reduction and zero-emission initiatives.
